Database Services

AWS Aurora is a relational database service provided by amazon cloud. This is one of the extensively used services for the low latency, data storage and value-based data storage and processing. It can only be used on AWS platform, unlikely MySQL database which can be installed on a local device.

Setting up Aurora RDS Serverless Instance

For using any AWS service you need an AWS account. Here we are assuming that you have set up the AWS account, if not visit **AWS Console (https://portal.aws.amazon.com/billing/signup#/start)** to create an account.

Free Product Offers

Build database solutions using these product offers from the AWS Free Tier.

PRODUCT	DESCRIPTION	FREE TIER OFFER DETAILS	PRODUCT PRICING
Amazon Neptune (https://aws.amazon.com/neptune/?	Fully managed, high-performance graph database using popular open-	30 DAY FREE TRIAL	Amazon Neptune Pricing (https://aws.amazon.com/neptune/pricing/?p=ft&c=db)

p=ft&c=db&z=3) Graph Database Service	source APIs such as Gremlin, SPARQL and openCypher.	**750 hours** of Neptune t3.medium or t4g.medium instance usage **10 million** I/O requests **1 GB** of storage **1 GB** of backup	
Amazon RDS (https://aws.amazon.com/rds?p=ft&c=db&z=3) Managed Relational Database Service	Amazon RDS is a managed relational database service for MySQL, PostgreSQL, MariaDB, Oracle BYOL, or SQL Server	**12 MONTHS FREE** **750 hours** per month of db.t2.micro, db.t3.micro, and db.t4g.micro Single-AZ instance usage (applicable database engines) **20 GB** of general purpose (SSD) database storage **20 GB** of storage for database backups and database snapshots	Amazon RDS Pricing (https://aws.amazon.com/rds/pricing/?p=ft&c=db)
Amazon DynamoDB (https://aws.amazon.com/dynamodb/?p=ft&c=db&z=3) NoSQL Database Service	A serverless database for applications that need high performance at any scale.	**ALWAYS FREE** **25 GB** of storage **25 units** of write capacity **25 units** of read capacity (enough to handle up to 200 million requests per month)	Amazon DynamoDB Pricing (https://aws.amazon.com/dynamodb/pricing/?p=ft&c=db&z=3)
Amazon Redshift (https://aws.amazon.com/redshift/?p=ft&c=db&z=3)	Fast, simple, cost-effective data warehousing.	**2-MONTH FREE TRIAL** **750 DC2.Large node hours** per month	Amazon Redshift Pricing (https://aws.amazon.com/redshift/pricing/?p=ft&c=db&z=3)

Data Warehouse			
AWS Database Migration Service (https://aws.amazon.com/dms/?p=ft&c=db&z=3) Database Migration	Migrate databases with minimal downtime.	**ALWAYS FREE** **750 hours** of Amazon DMS single Availability Zone dms.t2.micro instance usage **50 GB** of included general purpose (SSD) storage	**AWS Database Migration Service Pricing** (https://aws.amazon.com/dms/pricing/?p=ft&c=db)
Amazon ElastiCache (https://aws.amazon.com/elasticache/?p=ft&c=db&z=3) In-Memory Data Store	Managed, in-memory data store services that make it easy to deploy, operate, and scale popular open source compatible in-memory data stores.	**12 MONTHS FREE** **750 hours** of cache.t2micro node usage	**Amazon ElastiCache Pricing** (https://aws.amazon.com/elasticache/pricing/?p=ft&c=db&z=3)
Amazon MemoryDB (https://aws.amazon.com/memorydb/?p=ft&c=db&z=3) In-Memory Database	Redis-compatible, durable, in-memory database service for ultra-fast performance.	**2-MONTH FREE TRIAL** **750 t4g.small instance hours** per month **20 GB of data** per month	**Amazon MemoryDB Pricing** (https://aws.amazon.com/memorydb/pricing/?p=ft&c=db&z=3)
Amazon DocumentDB (https://aws.amazon.com/documentdb?p=ft&c=db&z=3) Managed Document Database Service	A scalable, highly durable, and fully managed database service for operating mission-critical MongoDB.	**30 DAY FREE TRIAL** **750 hours** of Amazon DocumentDB on t3.medium instances for 30 days **5 GB of storage** for 30 days **5 GB of backup storage** for 30 days **30M IOs** for 30 days	**Amazon DocumentDB Pricing** (https://aws.amazon.com/documentdb/pricing?p=ft&c=db&z=3)
